

Please note:  
When the distance is 1400mm, you have to mount spacer brace on the wall.

Section A-A

Walls in the milk pit must be vertical

Stainless steel edge is to be bolted to the edge.

Section B-B

Please note!  
Ventilation:  
During building up there must be provided the necessary ventilation to prevent condensed water in the milking parlor.

The walls of the milking Parlor, on which you mount the stall construction must be flat. No posts, rafters etc. are allowed as they might obstruct to the cows.

All measures in mm
